

SQL Multiple-Choice Question Paper

Total Marks: 25/25

1. Which SQL statement is used to retrieve data from a database?

- A) GET
- **B) SELECT**
- C) RETRIEVE
- D) FETCH

2. Which SQL keyword is used to filter records?

- A) FILTER
- B) SEARCH
- **C) WHERE**
- D) ORDER BY

3. The SQL command ORDER BY is used to:

- A) Filter records
- **B) Sort records**
- C) Group records
- D) Delete records

4. What does the DISTINCT keyword do in SQL?

- A) Returns all rows
- B) Deletes duplicate rows
- **C) Selects unique rows**
- D) Joins tables

5. Which function in SQL is used to count the number of rows in a table?

- A) SUM
- B) AVG
- **C) COUNT**
- D) TOTAL

6. Which SQL clause is used to group rows with the same values?

- **A) GROUP BY**
- B) ORDER BY

- C) WHERE
- D) DISTINCT

7. Which of the following statements is correct for INNER JOIN?

- A) Returns only unmatched rows from both tables
- B) Returns matched rows from one table only
- C) Returns only matched rows from both tables
- D) Returns all rows from both tables

8. What does the HAVING clause do in SQL?

- A) Filters rows based on a condition
- B) Groups rows with identical values
- C) Filters groups after aggregation
- D) Counts records

9. To remove a table from a database, which command is used?

- A) DELETE
- B) REMOVE
- C) DROP
- D) ERASE

10. Which SQL keyword is used to retrieve unique values?

- A) UNIQUE
- B) DISTINCT
- C) SPECIFIC
- D) SEPARATE

11. The LIKE keyword is used for:

- A) Counting rows
- B) Matching patterns
- C) Sorting rows
- D) Joining tables

12. Which command is used to modify existing data in a table?

- A) MODIFY
- B) CHANGE
- C) UPDATE
- D) ALTER

13. In SQL, what does the MAX function do?

- A) Finds the lowest value
- B) Finds the average value
- C) Finds the highest value
- D) Counts all values

14. The IN operator is used to:

- A) Compare values within a range
- B) Compare multiple possible values
- C) Check if value is NULL
- D) Create indexes

15. Which SQL function calculates the average of numeric values?

- A) TOTAL
- B) AVG
- C) COUNT
- D) SUM

16. To retrieve data from multiple tables in SQL, which of the following is used?

- A) UNION
- B) MULTI SELECT
- C) JOIN
- D) CONNECT

17. Which clause is used to sort results in ascending or descending order?

- A) SORT BY
- B) ARRANGE
- C) ORDER BY
- D) SEQUENCE

18. Which SQL statement is used to delete records?

- A) REMOVE
- B) DROP
- C) DELETE
- D) CLEAR

19. To retrieve records where a column value is null, you should use:

- A) = NULL

- B) IS NULL
- C) NULL
- D) CHECK NULL

20. The BETWEEN operator is used for:

- A) Matching exact values
- B) Specifying ranges
- C) Joining tables
- D) Sorting data

21. Which SQL function returns the lowest value in a set?

- A) MIN
- B) LOWER
- C) LEAST
- D) SMALL

22. Which SQL keyword is used to combine multiple conditions?

- A) AND/OR
- B) IF
- C) ALSO
- D) CHECK

23. What is the purpose of the GROUP BY clause?

- A) Sorts rows
- B) Aggregates rows with the same values
- C) Filters rows
- D) Joins tables

24. Which of the following constraints uniquely identifies each row in a table?

- A) FOREIGN KEY
- B) PRIMARY KEY
- C) INDEX
- D) CHECK

25. The UNION operator is used to:

- A) Combine the results of two or more queries
- B) Remove duplicates
- C) Create tables
- D) Join tables
